The Mark B.

Adms

NZ,

Visiting Professorship in Transplant Fun

The Mark B. Adms NZ, Visiting Professorship in Transplant Fun  
 established by the family of Dr. Adms supports the annual lecture series in  
 tribute to the life and career of Dr. Adms The annual lecture features a  
 nationally acclaimed visiting professor with extensive experience in organ  
 transplantation The lectures are meant to inspire generations of medical  
 students and residents (just as Dr. Adms did). Dr. Adms was appointed  
 Chair of the Department of Surgery in 2003 after leading  
 Transplant Surgery for 17 years He was Professor of Surgery  
 Transplant Surgery and former Director of the Frontier and Medical College  
 of Vermont's Transplant Program The Transplant Program was established  
 in 1967 with a focus on kidney, liver, and pancreas  
 transplant. Dr. Adms  
 Vermont Physicians Executive Committee

During his tenure, Dr. Adms made enormous contributions to medical student and resident education. He  
 directed the student education efforts in the Department of Surgery for many years and inspired the career  
 choices of countless medical students and former surgical residents working across the country today.

Matthew C. Cooper, NZ, who holds the Mark B. Adms Endowed Chair in Surgery at NZ, Vermont is Chief of  
 Transplant Surgery and Director of Solid Organ Transplantation, created on the visiting professorship as  
 a fitting and vibrant legacy of Dr. Adms. "I had the privilege of learning that and science of solid  
 organ transplantation from Dr. Adms as a post NZ surgical resident. He was both committed to his  
 profession and to the education and training of residents and students. He always wanted to expect the  
 best of us. I, among many others, was inspired to become a transplant surgeon because of Dr. Adms and  
 remain forever grateful and humbled to hold the Chair in his rare honor. " The Division of Transplant Surgery  
 selects the visiting professor, organizes and hosts the event.

In addition to giving a formal lecture, the visiting professor will hold a "rounding table" session during which he  
 or she talks informally with NZ Vermont students and residents about topics such as patient care, research, and a  
 physician's life in an academic medical center. Including this session in the visit would be especially important to Dr.  
 Adms, who cared deeply about all aspects of a medical career, both in and out of the hospital.
